

TRUSTED for more than 50 YEARS
to keep SMILES on PASSENGER's faces!

Reliable and powerful modules
for baggage handling systems
Made by TRANSNORM

Global
Excellence for
Airports

Global Excellence by TRANSNORM

DELIVERING HIGH PERFORMANCE MODULES & FUTURE-PROOF SMART SOLUTIONS

FUNCTION OVERVIEW

With more than 100,000 modules installed at over 300 airports, including the world's top 30 airports.

As a producer of conveyor equipment modules and solutions, TRANSNORM has been a reliable partner for system integrators and end customers for over 50 years. Asking and listening and our experience in the industry form the basis of this cooperation. The results are solutions that assure you of the necessary edge in day-today competition.

Global Excellence for Airports

With an installed base of more than 100,000 conveyors, we are a leading provider of modules for baggage handling systems. In the process, our secret for success is as subtle as it is simple: We listen to and hear what airport operators and integrators have to say to us. We have been learning this way for over 50 years and use this knowledge to bring about continuous improvement in our products. The outcome: More than 300 airports across the globe – among them the top 30 – place their trust in TRANSNORM.

PROVEN WORLDWIDE

TRANSNORM belt curve conveyors are the result of our constant pursuit of the needs of the operators and integrators of baggage handling systems. The holistic construction concept combines the proven reliability of the

TRANSNORM belt curves with the best-in-class values with respect to energy consumption, smoothness in running and maintenance-friendliness. The results are considerably reduced life cycle costs and a high level of economy.

GLOBAL AIRPORT CURVE
+ BEST IN CLASS
+ EASY INTEGRATION

CURVE CONVEYING

TRANSNORM Belt Curves – Best-in-class in Performance, Reliability, Energy Consumption and Maintenance-friendliness

CONTINUOUS VERTICAL CONVEYING

TRANSNORM Helix Curves – Two functions, one conveyor, full speed

MERGING, DISTRIBUTING 30°/45°

TRANSNORM Angled Belt Conveyors for baggage handling with full belt design

TIMING/MERGING ON SORTER LINES

TRANSNORM Timing Conveyors – Accurate and Forceful

POWERED FACE DIVERTING

TRANSNORM Powered Belt Diverter – Simple and robust construction for standard flight baggage

VERTICAL DISTRIBUTION/MERGING

TRANSNORM VertiSwitch™ – Compact and Powerful
